

Baby-N-Me

3D/4D Ultrasound

Habersham OB/GYN

870 A Austin Dr.

Demorest GA 30535

706-754-3997

As we help you prepare for your birth experience, we want you to feel relaxed and confident—and personally involved in your baby’s healthy development, every step of the way. Jessica Cook, our Registered Sonographer, uses her expertise to show you and your family exactly what your baby looks like sleeping, yawning, kicking... even smiling! You’ll see changes right as they’re happening, on the monitor of our cutting-edge 3-D Digital Ultrasound. Our technology can help you and your entire family build a deeply personal connection with your baby, long before that Happy Birth Day arrives!

This Ultrasound is intended for your enjoyment and bonding with your unborn baby, only. This is **not** for diagnostic purposes. If a medical problem is incidentally seen, you will be advised that a diagnostic ultrasound be performed and your obstetrician will be notified.

Our sonographer, performing your ultrasound is experienced and nationally registered. Unfortunately this does not guarantee that your unborn baby will cooperate and there are many factors that play a role in a good 3D ultrasound, such as: Fetal position, placental position, fluid and body habitus. Be assured we will attempt to get your baby’s cooperation but cannot guarantee it, therefore you may feel dissatisfied with the images available. When attempting the scan, if no images can be obtained the session will be discontinued. If no images were obtained, you will only be charged a \$25.00 sitting fee, for our time.

By signing you understand and accept the above outlined risks.
